Traceability Report for Project Score 1.1.0

Author	Jan Würthner
Date	30 Oct 2023

Table of Contents

1. Project Definition

This library converts music score, given in an abstract data tree-structre (made of arrangements, tracks, voices, events), into a music sheet with a set of coordinates. Based on this output, any simple drawing tool can be used to display a full music score.

2. Scope

The scope of this document is a description of system requirements in combination with the test cases and their traceability.

3. Model

This chapter describes the data model

4. Use Cases

This chapter describes integration tests and use cases
